50X1-HUM

1. At approximately N 64-35, E 30-25, there is a road running in a general east-west direction, the surface of which is in a poor state of repair, although still good enough to handle automobile traffic. It looked as though there had not been much traffic on the road recently.
2. At approximately N 64-27, E 30-37, there is a road running in approximately an east-west direction. The road surface is in poor condition and appears to be used infrequently. It could be used by automobiles only with difficulty.
3. There is another road at approximately N 64-13, E 31-58 which runs approximately in a northwest-southeast direction. It is a country road, and the ditches on the side of the road are in poor condition. The surface of the road appears to have been neglected for a long time. Judging from the tracks on the road, it is used very little. A two-wire telephone line runs along the side of the road. The telephone poles are not new. A lake is approximately five kilometers away.
4. Early one morning in mid-July 1953, a sound similar to a very powerful dynamite blast at approximately N 64-35, E 30-24. It seemed to come from the northeast.
